

Public School Statewide Summary

Of the 1,027 public schools surveyed during the 2024-2025 Kindergarten Survey, 973 (94.7%) responded. Statewide, 92.6% of public-school kindergartners were fully immunized at the time of the survey (66,574 of 71,927 students). Students who were not fully immunized fell into the following categories (Note: arrows and corresponding figures represent a percent change greater than 0.1% between the 2023-2024 and 2024-2025 assessments, if applicable).

- | | | |
|--------------------------|----------------|--------|
| • Religious Exemption: | 3.3% (n=2,342) | ↑ 0.1% |
| • Incomplete Record: | 1.0% (n=735) | ↓ 0.1% |
| • Missing Record: | 0.3% (n=185) | ↓ 0.1% |
| • Temporary Certificate: | 1.6% (n=1,166) | ↓ 0.5% |
| • Transfer <30 days: | 0.1% (n=86) | ↔ |
| • Medical Exemption: | 0.1% (n=88) | ↔ |

Private School Statewide Summary

During the 2024-2025 survey, a substantial decline in the response rate of private schools occurred with 129 (52.9%) of 244 private schools responding (in comparison, the response rate was around 70.0% last year). Furthermore, 87.2% (3,279 of 3,761 students) of kindergartners enrolled in private schools were fully immunized, which represents a substantial 3.0% decrease in the fully immunized rate when compared to the previous year. Unlike public schools, for which student rosters are provided by the Department of Education, private schools lack centralized enrollment lists. Thus, the survey could not describe the number of private school students with immunization certificates validated by TennIIS. Overall, around 5.0% of all kindergartners were enrolled in private schools during the 2024-2025 school year.

Private school kindergartners who were not fully immunized fell into the following categories (Note: arrows and corresponding figures represent a percent change greater than 0.1% between the 2023-2024 and 2024-2025 assessments, if applicable):

- Religious Exemption: 8.9% (n= 334) ↑ 2.3%
- Incomplete Record: 2.5% (n= 95) ↑ 0.9%
- Missing Record: 0.4% (n=15) ↓ 0.8%
- Medical Exemption: 0.2% (n=7) ↑ 0.1%
- Temporary Certificate: 0.5% (n=17) ↑ 0.1%
- Transfer <30 days: N/A for private schools based on data collection methods

Figure 7. Percentage of 2024-2025 Private School Students Fully Immunized by County, Tennessee

Note: Only 129 out of 244 private schools completed the 2024-2025 Kindergarten Survey; this may influence the percentage of students fully immunized within each county.

Conclusion

This survey described recent trends of increased vaccine exemptions and decreased immunization coverage and protection for Tennessee children. To reduce risks for Tennessee school-aged children from vaccine-preventable diseases and outbreaks, maintenance of high rates of immunization coverage through immunizations is required. Efforts to increase the public's awareness and actions by communities, providers and public health are critical to maintain safe school environments for all children. Tennessee's medical providers are trusted sources of information about childhood diseases and immunizations. Medical providers are encouraged to utilize TennIIS to review immunization records and provide catch-up immunizations at every opportunity. Thank you for partnering with us to inform and protect Tennessee communities and children.

Caitlin N. Newhouse, MD, MPH
Medical Director, Vaccine-Preventable Diseases and Immunization Program
Communicable and Environmental Diseases and Emergency Preparedness Division
Tennessee Department of Health

Appendix 1: Percent Complete by County Table

To minimize the risk of a vaccine-preventable disease outbreak, the immunization coverage rate should remain at or above 95.0% to control highly infectious diseases such as measles, according to the CDC⁷. In the maps above and tables below, TDH categorized an immunization rate of at least 95.0% as “meets immunization goal” (green), an immunization rate of 90.0% to 94.9% as “needs improvement” (yellow), and an immunization rate below 90.0% as “places the community at increased risk” (red).

For detailed Kindergarten Survey results at the county, school district, and school levels, please see the School Districts (SD) by County Summary section below in **Appendix 2**.

Appendix 2: Public and Private School Summaries by County and School District

The following tables and graphs describe data: 1) at the county-level, featuring information for both public and private schools within the county; and 2) at the school district level, featuring information for all schools within the school district. Data are presented by county in alphabetical order, with school districts nested under each respective county in alphabetical order, and schools nested under each respective school district in alphabetical order.
